1 Plaintiff Electronics for Imaging, Inc. ("EFI"), for its claims against Defendant Tesseract Ltd.
2 ("Tesseract"), alleges as follows:

3 **JURISDICTION**

4 1. This action arises under the patent laws of the United States, Title 35, United States
5 Code. This Court has jurisdiction over the subject matter of this declaratory judgment action under
6 28 U.S.C. §§ 2201, 2202, 1331, 1338(a) and 1367(a).

7 2. This Court has personal jurisdiction over Tesseract by way of Tesseract's ongoing and
8 substantial business in the Northern District of California. Based on information and belief, Tesseract,
9 through its agents, affiliates, and/or alter egos, has continuing and extensive contacts with this forum,
10 including contacts with companies in this forum to which it sells and provides service support for
11 variable data printing ("VDP") software and hardware. Moreover, based on information and belief
12 Tesseract has, through its agents, affiliates and/or alter egos, accused EFI's customers of performing,
13 within this judicial district, acts constituting patent infringement. EFI's principal place of business is
14 within this judicial district.

15 **VENUE**

16 3. Venue is proper under 28 U.S.C. §§ 1391(b), (c) and 1400(b).

17 **INTRADISTRICT ASSIGNMENT**

18 4. EFI's principal place of business is located within the County of San Mateo, and this is
19 an intellectual property action, therefore it can be assigned to the San Francisco Division pursuant to
20 Civil L.R. 3-2(c).

21 **THE PARTIES**

22 5. EFI is a Delaware corporation with its principal place of business within the County of
23 San Mateo at 303 Velocity Way, Foster City, California 94404.

24 6. EFI is informed and believes that Tesseract is an Ohio limited liability company with its
25 principal place of business at 8792 Maineville, Maineville, Ohio 45039.

FACTUAL ALLEGATIONS

7. In conjunction with its industry-leading Fiery® print controllers, EFI offers pioneering variable data printing ("VDP") solutions. VDP refers to the ability to customize printed material by mixing and matching both graphical and text content. VDP links document layouts to databases including text and graphics objects for combination into personalized documents for printing. During the VDP printing process, computer applications take content from the databases and integrate it into a document according to rules that specify which elements are used and where they are placed. As a result, VDP can make each printed document different by changing the information for each print job. EFI's industry-leading VDP technologies include its Fiery® FreeForm and Fiery® FreeForm 2 software, Fiery® print controllers, and mid-range to high-end Fiery® production servers.

8. In addition to selling its own products, EFI sells VDP components to other original equipment manufacturers ("OEM's"). OEMs such as Canon USA, Inc. ("Canon"), Ricoh Company, Ltd. ("Ricoch"), and Konica Minolta Business Technologies, Inc. ("K-M"), incorporate EFI's components into their digital printing equipment. Canon utilizes the EFI VDP components in its ColorPASS-Z7500/Z7100/Z6100 servers ("ColorPASS servers"). Ricoh utilizes the EFI VDP components in its Ricoh Aficio Color 3506, Ricoh Aficio Color 4506, Ricoh Aficio Color 6513, Ricoh Aficio Color 3260C, Ricoh Aficio Color 5560, Lanier 5813, Lanier 5625, Lanier LC031, Lanier LC155, Lanier LD160c, Savin SDC326, Savin SDC326A, Savin SDC531, Savin C6045, Savin SDC413, Savin SDC555, Gestetner CS231, Gestetner CS225, Gestetner CS213D, Gestetner CS331, and Gestetner DSc460 variable-enabled printing systems ("Ricoch printing systems") as well as Toshiba e-STUDIO 4500c, e-STUDIO 5500c, e-STUDIO 900, and e-STUDIO 1050 (Ricoch development name Bellini-C2a, Bellini-C2b, Venus-C1a and Venus-C1b, respectively) variable-enabled printing systems ("Toshiba printing systems").

9. On October 28, 2004, Tessonron sued Xerox Corporation ("Xerox") for patent infringement in the United States District Court for the Northern District of Ohio. Tessonron alleges that Xerox's VIPP® software and associated VIPP®-enabling printing systems infringe seven patents assigned to Tessonron. VIPP® is an acronym for Variable Data Intelligent PostScript Printware a VDP

1 software program created by Xerox in the early 1990s. Xerox's VIPP® software and VIPP®-enabling
2 printing systems are compatible with EFI Fiery® print controllers.

3 10. On November 1, 2004, Tessonon sued GMC Software AG and GMC Software
4 Technology, Inc. (collectively "GMC") for patent infringement in the United States District Court for
5 the Northern District of Ohio. Tessonon alleges that all versions of GMC's PrintNet™ software
6 infringe the same seven patents asserted in its suit against Xerox. PrintNet™ is VDP software used to
7 create and produce customized variable data documents.

8 11. In 2005, Tessonon sent a letter to EFI, informing EFI that it had recently filed suit
9 against Xerox and GMC for patent infringement in the United States District Court for the Northern
10 District of Ohio. Tessonon also threatened that EFI should negotiate with it now because, depending
11 on how the litigation against Xerox and GMC progressed, Tessonon may decide that it would be better
12 served enforcing its rights with respect to other parties, including EFI, through litigation.

13 12. EFI has attempted in vain to deal with Tessonon directly. On April 6, 2005, EFI
14 requested for Tessonon to send copies of relevant patents, file histories, and any other documents that
15 would show how Tessonon's patents relate to EFI's products. Tessonon never responded.

16 13. Instead, Tessonon sidestepped EFI and sent letters wrongly alleging patent infringement
17 to many of EFI's customers.

18 14. On or about April 12, 2005, Tessonon sent a letter to Canon explicitly charging that the
19 Canon ColorPASS servers infringe at least several of Tessonon's patents and threatening that if Canon
20 sold its ColorPASS servers without a license, "the cost to Canon could be significant." Canon has
21 demanded that EFI indemnify Canon against Tessonon's claims.

22 15. On September 27, 2006, Tessonon sent a letter to K-M asserting patent rights and
23 explicitly charging that the K-M OEM products infringe at least several of Tessonon's patents.

24 16. EFI sent another letter to Tessonon on January 19, 2007, after Tessonon refused to deal
25 with EFI directly while harassing its customers. EFI reiterated its original request and further asked
26 Tessonon to provide EFI with a claim chart, detailing why Tessonon believed that EFI's products
27 infringe Tessonon's patents. Again, EFI never heard back from Tessonon.

28

17. On March 26, 2007, Tesson sent a claim chart to Ricoh explicitly charging that the Ricoh printing systems infringe at least several of Tesson's patents. On April 27, 2007, Ricoh sent a letter to EFI notifying EFI regarding Tesson's warning of patent infringement.

18. On June 1, 2007, Ricoh sent a letter and claim charts to EFI notifying EFI about further patent infringement allegations from Tesson in regards to the Toshiba printing systems that Ricoh supplied to Toshiba Tec Corp., employing Fiery® controller supplied to Ricoh from EFI.

19. On September 26, 2007, Tesson filed a Complaint in the Northern District of Ohio alleging, inter alia, that K-M's products, which incorporate EFI's Fiery® print controllers, infringe one or more claims of U.S. Patent Nos. 5,729,665 ("the '665 patent"), 5,937,153 ("the '153 patent"), 6,209,010 B1 ("the '010 patent"), 6,381,028 B1 ("the '028 patent"), 6,487,568 B1 ("the '568 patent"), 6,599,325 B2 ("the '325 patent"), 6,687,016 B2 ("the '016 patent"), and 6,771,387 B2 ("the '387 patent"), collectively (the "patents-in-suit"). Tesson based its accusations on the presence of EFI Fiery® print controllers in K-M's products.

20. Shortly after receiving a copy of the Complaint, K-M notified EFI and demanded that EFI defend, indemnify and hold harmless K-M.

21. EFI once again sent Tesson a letter on October 9, 2007 asking Tesson to resolve this conflict with EFI directly.

22. Tesson's continued accusations and threats create an uncertainty concerning EFI's future business plans and an immediate and real controversy now exists between EFI and Tesson on all claims asserted herein. Based on the foregoing, there is an actual, immediate and justiciable controversy between EFI and Tesson as to the infringement and validity of the '665, '153, '010, '028, '568, '325, '016, and '387 patents.

FIRST CLAIM OF RELIEF

DECLARATORY JUDGMENT OF NON-INFRINGEMENT OF U.S. PAT. NO. 5,729,665

23. EFI realleges and incorporates the allegations of paragraphs 1 through 22.

24. EFI has not infringed, directly, literally, by equivalence, by inducement, contributorily, or otherwise, any valid claim of United States Patent No. 5,729,665 ("the '665 patent").

25. To resolve the legal and factual questions raised by Tesson and to afford relief from the uncertainty and controversy which Tesson's accusations have precipitated, EFI is entitled to a declaratory judgment that it does not infringe the '665 patent.

SECOND CLAIM OF RELIEF
DECLARATORY JUDGMENT OF INVALIDITY OF U.S. PAT. NO. 5,729,665

26. EFI realleges and incorporates the allegations of paragraphs 1 through 25.

27. One or more of the claims of the '665 patent are invalid for failure to comply with the conditions for patentability specified in 35 U.S.C. § 101, et seq., including without limitation the requirements in 35 U.S.C. §§ 101, 102, 103, and/or 112.

28. To resolve the legal and factual questions raised by Tesson and to afford relief from the uncertainty and controversy which Tesson's accusations have precipitated, EFI is entitled to a declaratory judgment that one or more of the claims of the '665 patent are invalid.

THIRD CLAIM OF RELIEF
DECLARATORY JUDGMENT OF UNENFORCEABILITY OF U.S. PAT. NO. 5,729,665

29. EFI realleges and incorporates the allegations of paragraphs 1 through 28.

30. The '665 patent is unenforceable.

31. To resolve the legal and factual questions raised by Tesson and to afford relief from the uncertainty and controversy which Tesson's accusations have precipitated, EFI is entitled to a declaratory judgment that the '665 patent is unenforceable.

FOURTH CLAIM OF RELIEF
DECLARATORY JUDGMENT OF NON-INFRINGEMENT OF U.S. PAT. NO. 5,937,153

32. EFI realleges and incorporates the allegations of paragraphs 1 through 31.

33. EFI has not infringed, directly, literally, by equivalence, by inducement, contributorily, or otherwise, any valid claim of United States Patent No. 5,937,153 ("the '153 patent").

34. To resolve the legal and factual questions raised by Tesson and to afford relief from the uncertainty and controversy which Tesson's accusations have precipitated, EFI is entitled to a

1 declaratory judgment that it does not infringe the '153 patent and further that K-M's utilization of
2 EFI's Fiery® print controllers does not infringe the '153 patent.

3
4 **FIFTH CLAIM OF RELIEF**
DECLARATORY JUDGMENT OF INVALIDITY OF U.S. PAT. NO. 5,937,153

5 35. EFI realleges and incorporates the allegations of paragraphs 1 through 34.

6 36. One or more of the claims of the '153 patent are invalid for failure to comply with the
7 conditions for patentability specified in 35 U.S.C. § 101, et seq., including without limitation the
8 requirements in 35 U.S.C. §§ 101, 102, 103, and/or 112.

9 37. To resolve the legal and factual questions raised by Tesson and to afford relief from
10 the uncertainty and controversy which Tesson's accusations have precipitated, EFI is entitled to a
11 declaratory judgment that one or more of the claims of the '153 patent are invalid.

12
13 **SIXTH CLAIM OF RELIEF**
DECLARATORY JUDGMENT OF UNENFORCEABILITY OF U.S. PAT. NO. 5,937,153

14 38. EFI realleges and incorporates the allegations of paragraphs 1 through 37.

15 39. The '153 patent is unenforceable.

16 40. To resolve the legal and factual questions raised by Tesson and to afford relief from
17 the uncertainty and controversy which Tesson's accusations have precipitated, EFI is entitled to a
18 declaratory judgment that the '153 patent is unenforceable.

19
20 **SEVENTH CLAIM OF RELIEF**
DECLARATORY JUDGMENT OF NON-INFRINGEMENT OF
21 **U.S. PAT. NO. 6,209,010 B1**

22 41. EFI realleges and incorporates the allegations of paragraphs 1 through 40.

23 42. EFI has not infringed, directly, literally, by equivalence, by inducement, contributorily,
24 or otherwise, any valid claim of United States Patent No. 6,209,010 B1 ("the '010 patent").

25 43. To resolve the legal and factual questions raised by Tesson and to afford relief from
26 the uncertainty and controversy which Tesson's accusations have precipitated, EFI is entitled to a
27
28

1 declaratory judgment that it does not infringe the '010 patent and further that K-M's utilization of
2 EFI's Fiery® print controllers does not infringe the '010 patent.

3
4 **EIGHTH CLAIM OF RELIEF**
DECLARATORY JUDGMENT OF INVALIDITY OF U.S. PAT. NO. 6,209,010 B1

5 44. EFI realleges and incorporates the allegations of paragraphs 1 through 43.

6 45. One or more of the claims of the '010 patent are invalid for failure to comply with the
7 conditions for patentability specified in 35 U.S.C. § 101, et seq., including without limitation the
8 requirements in 35 U.S.C. §§ 101, 102, 103, and/or 112.

9 46. To resolve the legal and factual questions raised by Tessonon and to afford relief from
10 the uncertainty and controversy which Tessonon's accusations have precipitated, EFI is entitled to a
11 declaratory judgment that one or more of the claims of the '010 patent are invalid.

12
13 **NINTH CLAIM OF RELIEF**
